

## Community

***Letters to the Editor*****Denny Foil Now Available in Small Quantities for MCS Use!**

Dear MCS Community,

My name is Todd Newman; my family owns Denny Wholesale Services, which manufactures Denny Foil. Denny Foil is a non toxic radiant barrier that comes in a roll and can be used to cover the floors, walls, and ceilings to prevent VOC (Volatile organic compounds) off gassing. Denny Foil is used to seal off particleboard, plywood, and other substances that cause emissions.

I receive about a dozen calls a month from MCS sufferers. It has pained me to turn away those coping with MCS because traditionally we only wholesale our products. We are pleased to announce that for the first time in our 70+ year history we are shipping small quantities of Denny Foil directly to the public! Denny Wholesale is sympathetic to the MCS community and dedicated to improving your quality of life. From our family to your community, we hope that we can meet your needs!

Please feel free to e-mail me [todd@dennywholesale.com](mailto:todd@dennywholesale.com) or call 800-327-6616 with any questions regarding Denny Foil.

From our family at Denny Wholesale, we wish you health and thank you for your time!

Sincerely,

Todd M. Newman
